DETAILED ACTION

Response to Amendment

1. The Examiner has carefully considered Applicant's remarks and accompanying amendments in the response dated 12/08/05. Applicant's amendments to the claims and drawings have been entered. The pending claims at this time in the prosecution are 1-23.

Response to Arguments

2. Applicant's arguments filed on 12/08/05 are acknowledged and will be addressed by the Roman Numerals in the response. With regard to Applicant's Amendment to the Drawings

(I)- The new formal drawings have been entered, however there are a few issues with them.

- Firstly, Applicant needs to add a paragraph to the specification entitled "detailed description of the drawings;
- The drawings are objected to under 37 CFR 1.83(a) because they fail to show what the entire composite is, thus you need a single reference number indicating all three layers of the composite as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be

necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

- The drawings are objected to under 37 CFR 1.83(a) because they fail to show the waterproof coating layer as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

II. With regard to the claim objections, Applicant by way of amendment has clarified the claim language in claim 1; however, in doing so they forgot to give the second layer antecedent basis. So please amend the claim to state: A penetration resistant material comprising at least a double layer of woven fabric wherein the double layer comprises a first layer of fabric and a second layer of fabric, wherein.....

II. (Second II). With regard to the rejection under 35 USC 112-2, (improper ratios) Applicant has remedied this rejection, but now the specification needs to reflect the same and is thus now objected too.

With regard to the part of the rejection pertaining to the fabric weight, Applicant's response is adequate and this part of the rejection is withdrawn.

III. Applicant's arguments with respect to the art rejection have been fully considered and are persuasive. This rejection has been withdrawn.

IV. With regard to the ODP over 10/471089, 6662369, 6610618 and 6890871 in view of Bachner. All these rejections are maintained. Structurally they are exactly the same or nearly the same i.e. fiber type, cover factor and linear density. The only difference is the waterproof coating layer as is noted by Applicant. The difference leads us to the obviousness type of Double Patenting, hence the addition of the Bachner (USPN 5471906) who teaches making their ballistic products waterproof/moisture vapor permeable and is thus an obvious variant of Applicant's ballistic invention. This can easily be remedied with a Terminal Disclaimer. Most of the other cases related in this same lineage have filed Terminal Disclaimers over the same issues. Additionally, Applicant traverses that Bachner does not teach coating the second set of threads in their composite. To this the Examiner contends that the portion that is coating is the outermost layer of the fabric, which would have the

same second set of threads that Applicant desires and thus this point is not found to be convincing.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
